Sr. Software Engineer

Summary

As an experienced web application developer with a passion for design and a drive to learn, my career goal is to become a technical lead in .NET technologies. With 7+ years of experience in developing and designing travel booking applications, hotel management systems, e-commerce platforms, and various other projects. I have a deep understanding of software development methodologies, design patterns, and programming languages. I also have experience working collaboratively with teams on HRM, payroll, accounts, EIMS, inventory, and other projects.
I enjoy exploring new technologies, tools, and techniques, and sharing my knowledge with others. As a highly motivated and honest individual, I am committed to continuous learning, professional development, and contributing to the success of my team and organization.
